ABSTRACTED-PUB-NO: JP61108700A

BASIC-ABSTRACT:

Wiping cleaner for cleaning fouling by wiping fouling, prepd. by impregnating web (e.g. paper or unwoven cloth) with detergent compsn. comprising 10-40 wt.% vegetable gum, 0.2-10 wt.% surface active agent having cleaning activity, 0.1-10 wt.% silicone oil, 0.1-10 wt.% ethyl alcohol and 30-89.6 wt.% water.

Vegetable gum is pref. acacia, tamarind gum or guar gum and used for retaining water. Surface active agent is pref. adduct of 12-16C higher alcohol (1 mol.) with ethylene oxide (2-15 mol.). Silicone oil acts as defoaming agent in prepn. of wiping cleaner compsn. and for being penetrated deeply into fouling to expel decomposed fouling from bottom of fouling to promote decompn. of fouling. Ethyl alcohol aids action of silicone oil for forming lowermost silicone oil layer by evapn. of ethyl alcohol in good timing by adjusting amts. of water, ethyl alcohol and silicone oil.

USE/ADVANTAGE - Wiping cleaner is effective for cleaning oily fouling on domestic or industrial goods and for protecting cleaned surface.
